Outline

- Rationale for CSS collection
- The Syntax
- Semantics examples, methods and lessons learned
- Present charter
- What we need from you

The Rationale for CSS and the Collection Effort

What is it? Why do it?

Ron Weller

Outline

- Common Semantics & Syntax What is it? What is the collection effort?
- Why do CSS?
- Why it is not a threat to you
- How it will be used

Common Semantics & Syntax - What is it?

- Common reference framework for military operational descriptions (knowledge)
 - Syntax is the generic knowledge categorization structure
 - Semantics are primarily the action terms and their meanings

Semantics Illustrated

Consider similar operations in two different contexts

Army Context

Warfighter Function - Protect Convoy Common Semantic Reference - **Defend** **Navy Context**

Warfighter Function - Defend BG Common Semantic Reference - **Defend**

- We need to relate "Protect" to "Defend"
 - Establish a common underlying term for reference purposes
 - Establish a one-to-one correlation between terms and their accepted meanings or "senses"
 - Call it "Common Semantics

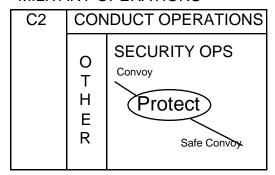

Syntax Illustrated

Consider the contexts of the two operations

Army Context

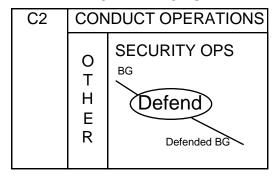

MILITARY OPERATIONS

Warfighter Function - Protect Convoy Warfighting Context - Security Operations Common Semantic Reference - **Defend**

Navy Context

MILITARY OPERATIONS

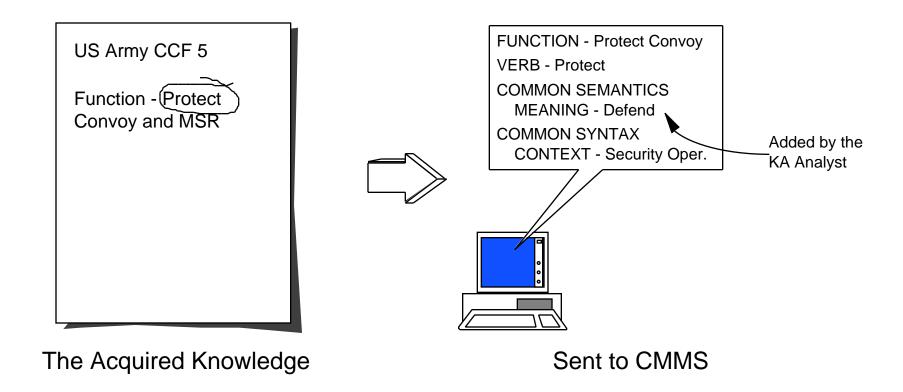

Warfighter Function - Defend BG
Warfighting Context - Security Operations
Common Semantic Reference - **Defend**

- To be meaningful, common semantics must be allowed to differ in different contexts
- We need to establish the context for this sense of "Defend"
 - Establish a generic syntax or structure of contexts
 - The common semantic term is valid within one of these contexts
 - Narrows the field enough to find similarities
 - Call it "Common Syntax" (where the word may be used)

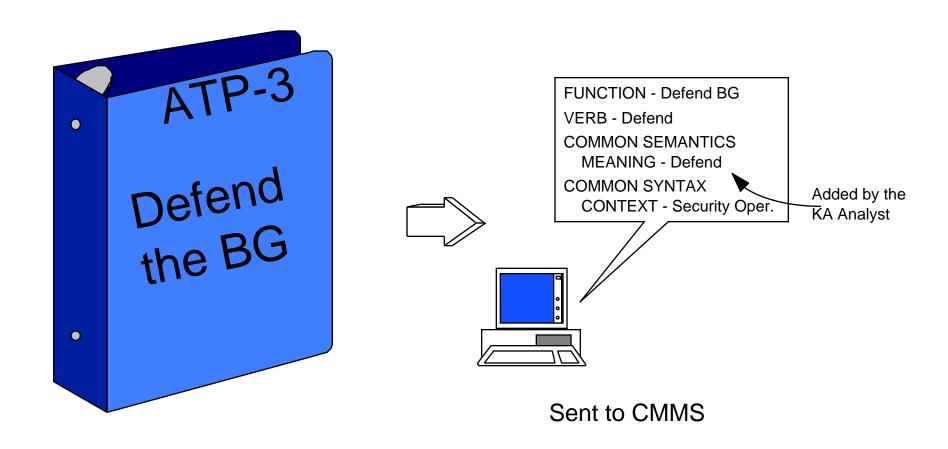

Why is This Not a Threat to Army Doctrine/KA

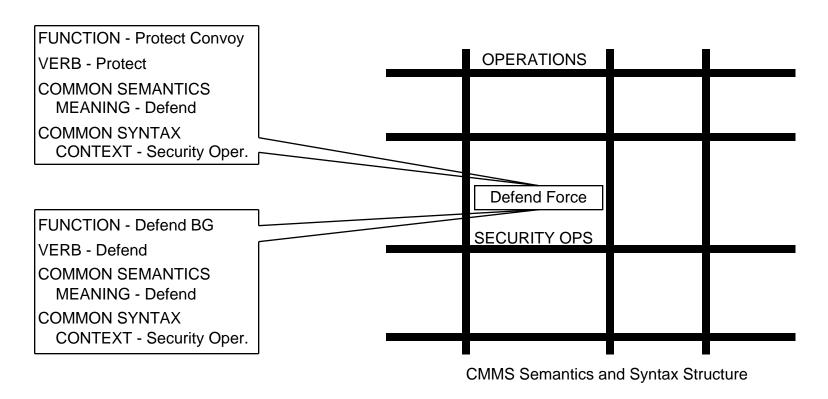

Why Is This Not a Threat to Navy KA

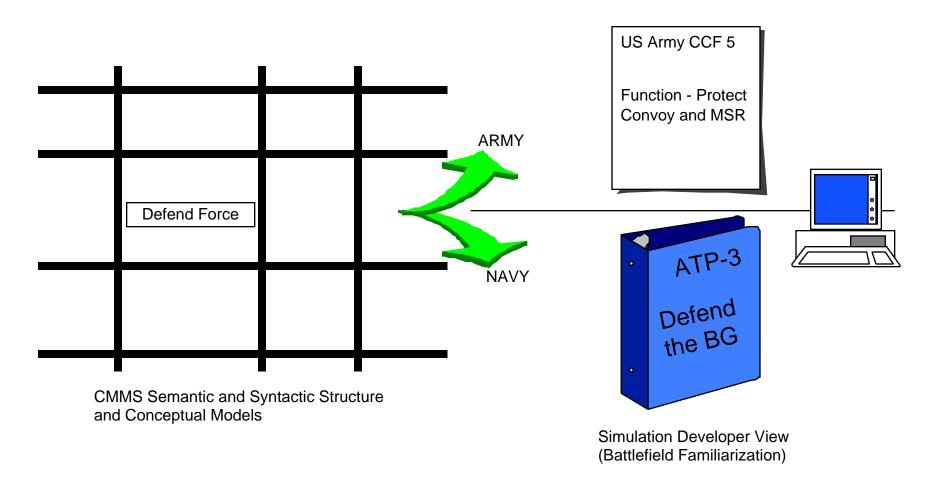

Getting Similar Military Functions Together

- Context, or syntax, gets processes in the same box
- Semantics syncs them up with each other
- Reuse and Integration are supported by the common "language"

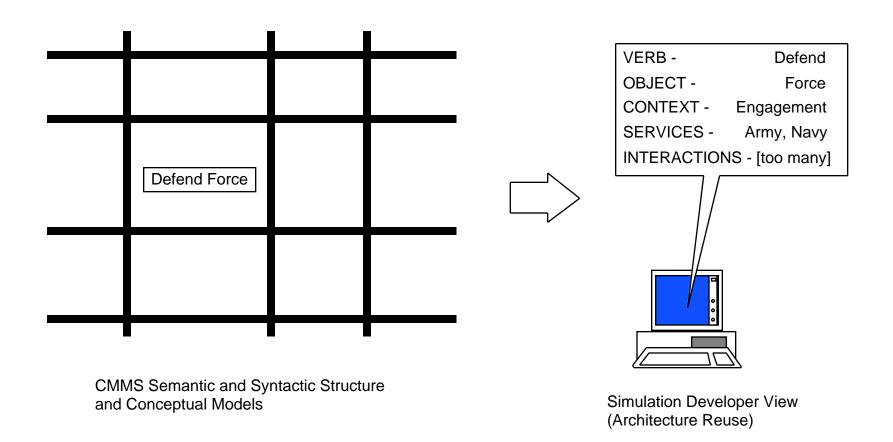

How is the Warfighter Information Retrieved?

Look at the Problem Space the Way the Warfighter Does

How is Reusability Information Retrieved?

Look at the Problem Space with an Eye toward Reuse
